- HOMOLOGATED EXHAUST
- REMOVABLE CATALYTIC CONVERTER AND DbKILLER, FOR USE ON TRACK
- CStAINLESS STEEL PIPE
- TITANIUM SILENCER
- EXCITING SOUND
- CAPTIVATING LOOK
- LIGHT WEIGHT

Athena keeps on developing products for many makes and models of bike and is introducing now a worldwide unique power kit for youth's most loved bike: the KTM DUKE 125. The kit includes an **aluminum BIG BORE Ø 65 mm nickel coated cylinder**, an **HC (high compression) piston**, an **homologated racing exhaust** and a **replacing ECU** with pre-set injection curve, which allows the engine to reach top level performances.

The kit is easy to be installed since it is **Plug&Play**: there is no need of any modification on the bike for the installation.

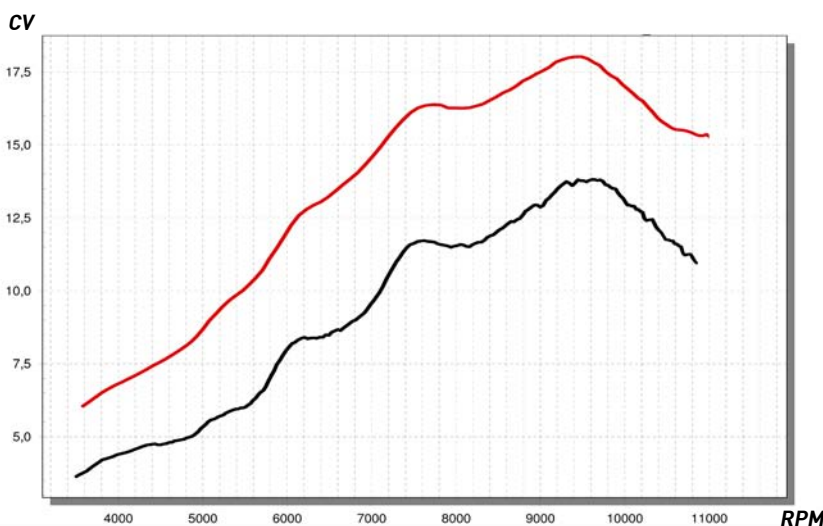

In addition, Athena allows you to buy all components separately, so that you can increase the bike performance step by step. All parts are developed, designed and manufactured to be integrated with each other, avoiding any issue in installation or functioning.

TECHNICAL DATA

CYLINDER BORE | STROKE | DISPLACEMENT | COMPRESSION RATIO | WHEEL POWER | EXHAUST WEIGHT

OEM	58 mm	47,2 mm	124,7 cm³	12,5:1	13,8 cv / 9.600 rpm	4,85 kg
P400270100018	65 mm	47,2 mm	156,6 cm³	13,4:1	18 cv / 9.400 rpm	2,45 kg
